DENTAL PREVENTION

Did you know? Tooth decay is one of the most common chronic childhood conditions—but it's completely preventable! At Siskiyou Community Health Center, we're all about keeping little smiles healthy and bright!

In the 2023-24 school year, we conducted 2,681 screenings:

- 438 fluoride varnishes
- 725 sealants placed (per tooth)
- 240 children received at least one sealant
- 272 uses of Silver Diamine Fluoride (SDF) (per tooth)
- 102 children who received SDF
- 699 children referred for early care with at least one cavity

EARLY CHILDHOOD SUPPORT

For the past 30 years, Siskiyou Community Health Center has helped parents keep their babies and toddlers healthy and safe. Babies don't come with instructions. That's why we're here with helpful information and support to help parents be the best they can be.

In 2024, we saw 217 families, including 85 new families:

- 2,041 home visits
- 129 different children attended playgroups
- Christmas presents for 85 Josephine County families
- New book for every child at each visit from Siskiyou staff
- 97.5% of children now have primary care provider
- 96.4% of children, 12 - 23 months, now have current immunizations
- 92.3% of children, 24 months and older, now have current immunizations
